Introduction

The main aim of this booklet is to exemplify standards for those teaching Cambridge International AS and A Level Accounting (9706), and to show how different levels of candidates' performance (high, middle and low) relate to the subject's curriculum and assessment objectives.

In this booklet, candidate responses have been chosen to exemplify a range of answers. Each response is accompanied by a brief commentary explaining the strengths and weaknesses of the answers.

For each question, each response is annotated with a clear explanation of where and why marks were awarded or omitted. This, in turn, is followed by examiner comments on how the answer could have been improved. In this way it is possible for you to understand what candidates have done to gain their marks and what they will have to do to improve their answers. At the end there is a list of common mistakes candidates made in their answers for each question.

This document provides illustrative examples of candidate work. These help teachers to assess the standard required to achieve marks, beyond the guidance of the mark scheme. Some question types where the answer is clear from the mark scheme, such as short answers and multiple choice, have therefore been omitted.

The questions, mark schemes and pre-release material used here are available to download as a zip file from Teacher Support as the Example Candidate Responses Files. These files are:

How to use this booklet

Example candidate response – high	Examiner comments
<p>(Q3) Inventory are goods, raw materials That required in the process of production. In many forms eg finished products, raw materials etc. ①</p> <p>low level of inventory will many small delivery imposition cost of ② small deliveries prevent business taking advantage of economies of scale. Thus the average cost will increase so profitability of business will be reduced. Also, if there is foreseen increase in demand, the less inventory for customer satisfaction lead to ③</p>	<p>1 It is useful, although not always necessary, to start off with a clear definition.</p> <p>2 Examiner comments are alongside the answers, linked to specific part of the answer. These explain where and why marks were awarded. This helps you to interpret the standard of Cambridge exams and helps your learners to refine their exam technique.</p> <p>3</p>

How the candidate could have improved their answer

The second cost of customer satisfaction is not as well benefited from acknowledging that products will be unavailable, hence leading to disappointment.

In addition, three benefits have been explained. Presumably rather than foreseen but the candidate has explained such an answer.

This explains how the candidate could have improved their answer and helps you to interpret the standard of Cambridge exams and helps your learners to refine their exam technique.

Common mistakes candidates made in this question

(a) Not being able to move beyond Level 2 due to not understanding the effect of these two types of expenditure and the effect of this on the two expenditures and again the effect of this on the sales revenue.

(b) Confusion over what classes as an internal source of revenue – sales revenue or debentures.

This lists the common mistakes candidates made in answering each question. This will help your learners to avoid these mistakes at the exam and give them the best chance of achieving a high mark.

Assessment at a glance

For Cambridge International AS & A Level Accounting, candidates:

- take Papers 1 and 2 only (for the Cambridge International AS Level qualification)
- or**
- follow a staged assessment route by taking Papers 1 and 2 (for the Cambridge International AS Level qualification) in one series, then Paper 3 (for the Cambridge International A Level qualification) in a later series
- or**
- take Papers 1, 2 and 3 in the same examination series, leading to the full Cambridge International A Level.

All components are externally assessed.

Component	Weighting	
	AS Level	A Level
Paper 1 Multiple Choice 30 multiple choice questions based on the AS Level syllabus content 30 marks	1 hour 30%	15%
Paper 2 Structured Questions Four structured questions on the AS Level syllabus content Question 1 on financial accounting (30 marks) Questions 2 and 3 on financial accounting (2 × 15 marks) Question 4 on cost and management accounting (30 marks) Total 90 marks	1 hour 30 minutes 70%	35%
Paper 3 Structured Questions Paper 3 tests the additional content for the A Level, but also requires a knowledge and understanding of the AS Level content. Section A: Four structured questions on financial accounting (4 × 25 marks) Section B: Two structured questions on cost and management accounting (2 × 25 marks) Total 150 marks	3 hours –	50%

Teachers are reminded that the latest syllabus is available on our public website at www.cie.org.uk and Teacher Support at <https://teachers.cie.org.uk>

Paper 3 – Structured Questions

Question 1

Example candidate response – high	Examiner comments																																																								
<p>1 (a) 1. the amount received as donation may be different every each year while the annual subscription received by each member is fixed every ^{annual} year.</p> <p>2. A member subscription is paid by the same person every year while donations may be received by different persons or organisations.</p> <p>3. A member subscription can be received annually or</p> <p>3. The two types of member subscription are annual and life membership subscription while the two types of donations are general and specific. ②</p> <p>(b)</p> <table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr> <th style="text-align: left; padding-bottom: 5px;">Sunshine Social Club</th> <th style="text-align: right; padding-bottom: 5px;">Shop trading account for the year ended 31 December 2015</th> <th style="text-align: right; padding-bottom: 5px;">\$</th> <th style="text-align: right; padding-bottom: 5px;">\$</th> </tr> </thead> <tbody> <tr> <td style="padding-top: 5px;">Shop takings</td> <td></td> <td style="text-align: right; padding-top: 5px;">124 200</td> <td></td> </tr> <tr> <td>Less Cost of Sales</td> <td></td> <td></td> <td></td> </tr> <tr> <td style="padding-top: 5px;">Opening inventory</td> <td style="text-align: right; padding-top: 5px;">24 000</td> <td></td> <td></td> </tr> <tr> <td>+ Purchases (w1)</td> <td style="text-align: right;">84 300</td> <td></td> <td></td> </tr> <tr> <td></td> <td style="text-align: right;">108 300</td> <td></td> <td></td> </tr> <tr> <td>- Closing inventory</td> <td style="text-align: right;">(18 600)</td> <td style="text-align: right;">(89 700)</td> <td></td> </tr> <tr> <td>Shop gross profit</td> <td></td> <td style="text-align: right;">34 500</td> <td></td> </tr> <tr> <td>Less Expenses</td> <td></td> <td></td> <td></td> </tr> <tr> <td style="padding-top: 5px;">Water and electricity (w2)</td> <td style="text-align: right; padding-top: 5px;">56 40</td> <td></td> <td></td> </tr> <tr> <td>Insurance (w3)</td> <td style="text-align: right;">2300</td> <td></td> <td></td> </tr> <tr> <td>Provision for depreciation on shop equipment ^(w4)</td> <td style="text-align: right;">11 800</td> <td></td> <td></td> </tr> <tr> <td>Shopkeeper wages (w5)</td> <td style="text-align: right;">27 200</td> <td style="text-align: right;">(46 940)</td> <td></td> </tr> <tr> <td>Shop loss</td> <td></td> <td style="text-align: right;">(12 440)</td> <td></td> </tr> </tbody> </table>	Sunshine Social Club	Shop trading account for the year ended 31 December 2015	\$	\$	Shop takings		124 200		Less Cost of Sales				Opening inventory	24 000			+ Purchases (w1)	84 300				108 300			- Closing inventory	(18 600)	(89 700)		Shop gross profit		34 500		Less Expenses				Water and electricity (w2)	56 40			Insurance (w3)	2300			Provision for depreciation on shop equipment ^(w4)	11 800			Shopkeeper wages (w5)	27 200	(46 940)		Shop loss		(12 440)		<p>1 This script is a good example of a high-level answer.</p> <p>2 No marks are awarded for the third answer. The question asked candidates to state the difference between a donation and a member subscription. Shopkeeper wages (w5)	27 200	(46 940)																																																							
Shop loss		(12 440)																																																							

Example candidate response – high, continued	Examiner comments						
<p>W1: Purchases = Amount paid - owing at start owing at end $= \\$74500 - 54500 + 64300$ $\approx \\$84300$</p> <p>W2: W&F = $40\% \times [14800 - 2700 + 2000]$ $= 40\% \times 14100$ $\approx \\$5640$</p> <p>W3: Insurance = $25\% \times [9460 + 1400 - 1660]$ $= 25\% \times 9200$ $\approx \\$2300$</p> <p>W4:</p> <table style="margin-left: 100px;"> <tr> <td>Net book value of shop eq at start</td> <td style="text-align: right;">\$ 55 000</td> </tr> <tr> <td>+ Purchase of shop equipment</td> <td style="text-align: right;">4 000</td> </tr> <tr> <td></td> <td style="text-align: right;"><u>59 000</u></td> </tr> </table> <p>Depreciation = $20\% \times 59000$ $\approx \\$11800$</p> <p>W5: Shopkeeper wages = $\\$30400 - 3200$ $\approx \\$27200$</p> <p>(c) i. The chairman can try to find alternatives to the existing purchases of the gift shop, for example the supplies of the gift shop can be bought from other suppliers at a lower price. This would reduce cost of sales and increase profit. However, the quality of the gifts should also be considered as lower quality gifts might result in lower shop takings.</p>	Net book value of shop eq at start	\$ 55 000	+ Purchase of shop equipment	4 000		<u>59 000</u>	<p>Mark for (b) = 13/15</p> <p>4 This is a good answer. The candidate recognises that there will be a possible hidden cost of lower quality, which may reduce sales if the chairman buys cheaper products.</p>
Net book value of shop eq at start	\$ 55 000						
+ Purchase of shop equipment	4 000						
	<u>59 000</u>						

Example candidate response – high, continued	Examiner comments												
<p>Q. The chairman can also review the shopkeeper wages which has a major contribution to the shop loss. He can employ new shopkeepers at a lower wage rate. However, the cost of training the new shopkeepers should also be considered as well as their existing knowledge about the work.</p> <p style="text-align: right;">5</p>	<p>5 The candidate looks closely at the impact of employing new, cheaper shop staff, by considering the training cost implications. Excellent points.</p>												
<p>(d)</p> <table border="0" style="width: 100%;"> <tr> <td style="width: 60%;">Annual ball tickets</td> <td style="width: 40; text-align: right;">\$ 68 000</td> </tr> <tr> <td>- Hire of ballroom and band for annual ball</td> <td style="text-align: right;">(48 000)</td> </tr> <tr> <td>- Food for annual ball</td> <td style="text-align: right;">(36 000)</td> </tr> <tr> <td>deficit from annual ball</td> <td style="text-align: right;"><u>(16 000)</u></td> </tr> <tr> <td>Contribution by chairman = $50\% \times 16000$</td> <td style="text-align: right;">6</td> </tr> <tr> <td></td> <td style="text-align: right;">= \$ 8000 ↗</td> </tr> </table>	Annual ball tickets	\$ 68 000	- Hire of ballroom and band for annual ball	(48 000)	- Food for annual ball	(36 000)	deficit from annual ball	<u>(16 000)</u>	Contribution by chairman = $50\% \times 16000$	6		= \$ 8000 ↗	<p>Mark for (c) = 4/4</p> <p>6 A fully correct answer.</p> <p>Mark for (d) = 3/3</p> <p>Total marks awarded = 22 out of 25</p>
Annual ball tickets	\$ 68 000												
- Hire of ballroom and band for annual ball	(48 000)												
- Food for annual ball	(36 000)												
deficit from annual ball	<u>(16 000)</u>												
Contribution by chairman = $50\% \times 16000$	6												
	= \$ 8000 ↗												

How the candidate could have improved their answer

- (a) This candidate needed to provide one more difference between a donation and a member subscription to gain the third mark.
- (b) The candidate needed to apply the opening and closing adjustments for the shopkeeper's wages in the correct direction.

Mark awarded = (a) 2/3

Mark awarded = (b) 13/15

Mark awarded = (c) 4/4

Mark awarded = (d) 3/3

Total marks awarded = 22 out of 25

Example candidate response – middle**Examiner comments**

(a) If donation is given by fund raiser or individuals to be used for the financing of non profit making organisations' activities.

3 Whereas a member subscription received is income received to the non profit making organisation whereas a donation is given without any receipt in exchange whereas a subscription is paid by individual as they are a member.

1 This answer is awarded 17/25. It is a good example of a middle-level script.

2 This is a good example of showing workings; doing this allows the examiner to refer to them and award marks as appropriate.

3 The candidate correctly identifies two differences between a donation and a member's subscription. However, the question asked for three differences, so only two marks can be awarded.

Mark for (a) = 2/3

Example candidate response – middle, continued	Examiner comments																										
<p>(b) Trading account for the year ended 31 December 2015</p> <table border="1"> <tbody> <tr> <td>Shop takings</td> <td>\$ 124 200</td> </tr> <tr> <td>Opening inventory</td> <td>20 000</td> </tr> <tr> <td>Add purchases</td> <td>84 300</td> </tr> <tr> <td>Less closing inventory (cost of sales)</td> <td>(18 600)</td> </tr> <tr> <td></td> <td>(89 700)</td> </tr> <tr> <td>Gross profit</td> <td>④ 24 500</td> </tr> <tr> <td>Less shop expenses:-</td> <td></td> </tr> <tr> <td>Water and electricity</td> <td>⑤ 5 520</td> </tr> <tr> <td>Insurance</td> <td>2 200</td> </tr> <tr> <td>Depreciation of shop equipment</td> <td>11 800</td> </tr> <tr> <td>Shopkeeper wages</td> <td>23 750</td> </tr> <tr> <td></td> <td>(43 370)</td> </tr> <tr> <td>Loss for the year -</td> <td>⑥ 8 870</td> </tr> </tbody> </table>	Shop takings	\$ 124 200	Opening inventory	20 000	Add purchases	84 300	Less closing inventory (cost of sales)	(18 600)		(89 700)	Gross profit	④ 24 500	Less shop expenses:-		Water and electricity	⑤ 5 520	Insurance	2 200	Depreciation of shop equipment	11 800	Shopkeeper wages	23 750		(43 370)	Loss for the year -	⑥ 8 870	<p>④ Good labelling of gross profit.</p> <p>⑤ The figure for water and electricity is incorrect. Looking back at the workings above, it can be seen that the candidate has applied the adjustments of \$2 700 and \$2 000 in the wrong direction.</p> <p>⑥ Again, good labelling, allowing the examiner to reward the own figure loss for the year.</p> <p>Mark for (b) = 12/15</p>
Shop takings	\$ 124 200																										
Opening inventory	20 000																										
Add purchases	84 300																										
Less closing inventory (cost of sales)	(18 600)																										
	(89 700)																										
Gross profit	④ 24 500																										
Less shop expenses:-																											
Water and electricity	⑤ 5 520																										
Insurance	2 200																										
Depreciation of shop equipment	11 800																										
Shopkeeper wages	23 750																										
	(43 370)																										
Loss for the year -	⑥ 8 870																										
<p>(c)</p> <p>(i) Club can motivate staff by making job rotation. This will diversify their job activities ⑦</p> <p>(ii) Additional training can be given to employees so that they can improve their skills and creativity ⑧</p>	<p>⑦ Although it is a good thing to do, motivating staff will not necessarily increase takings and reduce the shop loss.</p> <p>⑧ No marks can be awarded for this. The candidate does not acknowledge the cost associated with training. It is also debatable whether training alone will increase takings or reduce the shop loss.</p> <p>Mark for (c) = 0/4</p>																										

Example candidate response – middle, continued	Examiner comments
<p>(d) Annual ball tickets - \$68000</p> <p>Less hire of ballroom, band (\$48000) for annual ball and food. (\$26000)</p> <p>Deficit <u>16000</u> 9</p> <p>Contribution of chairmen = $50\% \times 16000$ = \$8000</p>	<p>9 A perfectly correct calculation.</p> <p>Mark for (d) = 3/3</p> <p>Total marks awarded = 17 out of 25</p>

How the candidate could have improved their answer

- (a) The candidate needed to give another difference here.
- (b) The candidate used the wrong payment figure for the water and electricity (\$14 500 rather than \$14 800). This led to an incorrect calculation of the charge allocated to the shop trading account.
- (c) Neither of the two suggestions for improving the shop sales was valid. Ideas which would have a direct and immediate impact on the level of sales in the shop were required here.

Mark awarded = (a) 2/3

Mark awarded = (b) 12/15

Mark awarded = (c) 0/4

Mark awarded = (d) 3/3

Total marks awarded = 17 out of 25

Example candidate response – low

1	The difference between a donation and a member subscription is that a donation is made by someone who could be a member or a non-member of the club for a specific intention or for the club's activities... whereas a member subscription is made by a member to join the club. Secondly, a donation does not have a fixed amount but a subscription has a fixed amount. Lastly, a donation could be used for multiple purposes while a subscription is to be re-invested into the club for the members benefits.
2	
b)	Shop to Club's shop trading account for the year ended 31 December 2015
Shop takings	124 200
less: cost of sales	
3	
Opening inventory	24 000
(a) Purchases (74 500 + 64 300 - 54 500)	84 300
	108 300
less: closing inventory	18 600
	89 700
Gross profit	4 34 500
Less: Expenses	
Shopkeeper wages (30 400 - 3 200)	5 27 200
Net profit	7 300

Examiner comments

1 Overall, this answer scores 11/25 and is an example of a low-level script.

2 This is a good answer, with the candidate identifying three clear differences between a donation and a member subscription.

Mark for (a) = 3/3

3 Very few marks can be awarded here because the expenses for depreciation of the shop equipment, shop insurance, and shop water and electricity have not been included. The question identified the proportions of the total for insurance and electricity that should be allocated to the shop, together with accruals and prepayments in respect of them.

4 Good labelling of gross profit.

5 Although the candidate correctly includes the shopkeeper's wages as an expense, the adjustments for accrued and prepaid wages has not been made correctly, so no marks can be awarded.

Mark for (b) = 4/15

Example candidate response – low, continued		Examiner comments
<p>c) Two ways to improve the performance of the gift shop is to provide better customer service. By providing better customer service such as ^{hearing} training customer feedbacks can not only improve the performance of the shop but also retain customer loyalty and customers will also be more than willing to recommend the gift shop to their other friends. Furthermore, the shop can improve by bringing better quality gift products to satisfy customer needs.</p> <p>6 7 8</p> <p>9</p> <p>d) Debit from animal wall = $68\ 000 - 48\ 000 - 36\ 000 = 4\ 16\ 000$ $16\ 000 \times \frac{50}{50} = 8000$ The chairman had to contribute \$8000 to cover the debit</p>	<p>6 Improving customer service is not considered a valid way to improve the profit of the shop.</p> <p>7 Attempting to increase the number of customers, thereby increasing customer spending, should lead to an increase in profit.</p> <p>8 Bringing in better quality goods would have a cost associated with it. Had the candidate identified this fact and pointed out that, to be of benefit, any extra revenue generated should be greater than any cost, then marks would have been awarded for this suggestion.</p> <p>Mark for (c) = 1/4</p> <p>9 The answer for (d) is fully correct.</p> <p>Mark for (d) = 3/3</p> <p>Total marks awarded = 11 out of 25</p>	

How the candidate could have improved their answer

(b) The candidate assumed that only the shopkeeper's wages should be treated as an expense in the shop trading account, but should also have taken into account the expenses for water, electricity and insurance, as well as depreciation of the shop equipment, information about which was provided in the question.

(c) Two of the candidate's points were valid here, but they needed more development and explanation to earn further marks.

Mark awarded = (a) 3/3

Mark awarded = (b) 4/15

Mark awarded = (c) 1/4

Mark awarded = (d) 3/3

Total marks awarded = 11 out of 25

Common mistakes candidates made in this question

- (a)** Some candidates failed to identify three differences between a donation and a member subscription.
- (b)** Some candidates omitted some of the relevant shop expenses or did not adjust the accruals and prepayments of them in the correct direction. Labelling was also an issue here. Often ‘cost of sales’, ‘gross profit’ and ‘loss/profit for the year’ or ‘shop loss/profit’ were not mentioned. ‘Net loss’ was given, but this was not accepted.
- (c)** Many candidates did not expand on the points they made. Simply making a valid point earned 1 mark but each point needed to be expanded by identifying how this would impact on sales or profit to earn any extra marks.
- (d)** Some candidates attempted to prepare an income and expenditure account, which was not needed. Candidates should have focused solely on the receipts from the sale of tickets and the costs associated with the annual ball.

Question 2

Example candidate response – high

(a)(i) Workings:	1
W1: Rent \$8000	2
Manufacturing 75% x \$8000	
= \$6000	
Income Statement 25% x \$8000	
	\$2000

Alpha Limited		
Manufacturing Account for the year ended 30 April 2016		
	\$	\$
RAW MATERIALS		
Opening inventory		1000
+ Purchases	12200	
+ Carriage inwards	1100	13300
		14300
- Closing inventory		(3100)

+ Factory workers' wages		17500
Prime Cost		28700
Add Overheads		
Factory overheads	9700	
Factory supervisor's salary	8200	
Rent (W1)	6000	23900
Cost of production		52600
+ Factory profit (25% x 52600)	3	13150
Transfer value to Income statement		65750

(ii) Income Statement for the year ended 30 April 2016		
	\$	\$
Revenue		95000
Less Goods at transfer value		(65750)
Gross profit		29250
Less Expenses	4	
Office salaries	8500	
Rent (W1)	2000	
General office expenses	10000	(20500)
		8750
+ Factory profit		13150
Profit for the year		21900

Examiner comments

1 This candidate is awarded 24/25 marks for question 2. This is a good example of a high-level response.

2 A good example of the candidate showing their workings.

3 An excellent example of a manufacturing account. All items are labelled and, where necessary, the candidate provides workings in brackets for the calculation of factory profit.

Mark for (a) (i) = 8/8

4 Again, an excellent example of a well presented and labelled income statement. Note the final figure is identified as 'Profit for the year', the correct wording in line with IAS1.

Mark for (a) (ii) = 7/7

Example candidate response – high, continued

Examiner comments

(b)	5	
Profit for the year ended 30 April 2016		\$ 21 900
- Decrease in sales revenue (w2)		(9500)
+ Closing inventory at transfer value (w3)		6575
+ Decrease in general office expenses (w4)		500
- Increase in provision for unrealised profit		(1315)
Expected profit for the year ended 30 April 2017		18160
<u>Workings:</u>		
w2: Selling price = \$ 95000 1000		
		= \$ 95
Decrease in sales revenue = \$ 95 x 100 = \$ 9500		
w3: Units in clinv = 100 units Value of clinv = 65750 1000		
		= 6575
w4: General office expenses \$ 10 000 Fixed Variable \$ 5000 \$ 5000		
new general O.E = \$ 5000 + \$ 5000 x 9500 1000 = \$ 9500		
Decrease in general O.E = \$ 500		

5 The candidate shows whether items have been deducted from the starting profit for the year figure here. They also show their workings below, and these are fully referenced in their answer. Doing this allows the examiner to refer to the workings and award marks accordingly.

Mark for (b) = 5/5

Example candidate response – high, continued	Examiner comments
<p>w5: ↑ in prov. for unrealised profit $\Rightarrow 125\% = 6575$ $25\% = \frac{6575}{125} \times 25$ $= \\$1315$</p> <p>6 (c) Option 1 should be implemented because it will generate \$3060 more profit than option 2. Alpha limited should also maximise production from its fixed overheads and it can never be the extra units produced may be later used to meet unexpected rise in sales and choosing option 1 will allow the company to do so. Producing the extra units produced can also be sold at a lower price and the profitability can increase further.</p>	<p>6 The candidate is awarded 4 marks here. For the final mark, they needed to add something extra about option 1, such as the fact that it avoids unnecessary redundancies, or make a comment about option 2.</p> <p>7 Here, a mark is awarded for a decision, and a further mark is awarded as that decision is justified. In other words, the candidate backs up their judgment.</p> <p>8 The candidate goes on to fully justify their decision.</p> <p>Mark for (c) = 4/5</p> <p>Total marks awarded = 24 out of 25</p>

How the candidate could have improved their answer

(c) The candidate needed to add a further valid comment here. Selling extra units at a lower price would be unlikely to yield greater profitability. Indeed, it may result in less profit. Therefore, no mark could be awarded for this.

Mark awarded = (a) (i) 8/8, (ii) 7/7

Mark awarded = (b) 5/5

Mark awarded = (c) 4/5

Total marks awarded = 24 out of 25

Example candidate response – middle

1	Manufacturing Account for the year ended 30 April 2016		
ai		\$	\$
Direct costs:			
opening inventory of raw materials	1000		
Add purchases	12 200		
less carriage inwards	(1100)	3

less expenses & losses:			
office salaries		(8500)	
rent		(2000)	
general office expenses		(10000)	
Net profit	7	24100	

Examiner comments

1 This answer is awarded 15/25. A good example of a middle-range script.

2 The carriage inwards has been applied in the wrong direction, so no mark can be awarded here.

3 Had the candidate labelled this figure as 'cost of raw materials used', the examiner would have been able to award an 'own figure' mark.

4 Good labelling of prime cost figure, allowing the examiner to award an 'own figure' mark.

5 Unfortunately, this is as far as the candidate takes the manufacturing account. An 'own figure' mark is awarded for the well-labelled cost of production. However, the question indicated that finished goods were transferred at cost plus 25%. This has not been done by the candidate.

Mark for (a) (i) = 4/8

6 Good labelling of both the cost of production and the gross profit, allowing the examiner to reward both with 'own figure' marks.

7 No mark can be awarded for the final answer. The label of 'net profit' is not allowable under IAS1. Had the candidate labelled the figure 'profit for the year' an 'own figure' mark could have been awarded.

Mark for (a) (ii) = 5/7

Example candidate response – middle, continued	Examiner comments												
<p>b. statement to calculate profit:</p>													
<table border="1" style="width: 100%; border-collapse: collapse;"> <tr> <td style="padding: 5px;">Net profit from (a)</td> <td style="text-align: right; padding: 5px;">\$ 24100</td> <td style="text-align: center; width: 20px;"></td> </tr> <tr> <td style="padding: 5px;">less revenue (100 units)</td> <td style="text-align: right; padding: 5px;">(9500)</td> <td style="text-align: center; width: 20px;">w①</td> </tr> <tr> <td style="padding: 5px;">Add closing inventory (100 units)</td> <td style="text-align: right; padding: 5px;">30400</td> <td style="text-align: center; width: 20px;">w②</td> </tr> <tr> <td style="padding: 5px;">Appropriated profit for 900 units</td> <td style="text-align: right; padding: 5px;">19640</td> <td style="text-align: center; width: 20px;"></td> </tr> </table>	Net profit from (a)	\$ 24100		less revenue (100 units)	(9500)	w①	Add closing inventory (100 units)	30400	w②	Appropriated profit for 900 units	19640		<p>8 The correct starting position for the calculation is required here.</p>
Net profit from (a)	\$ 24100												
less revenue (100 units)	(9500)	w①											
Add closing inventory (100 units)	30400	w②											
Appropriated profit for 900 units	19640												
<p>w ①</p> $\text{Selling price of 1 unit} = \$95000 / 1000 \text{ units} = \95 $100 \text{ units} = \$95 \times 100 = \9500	<p>9 Correct calculation of lost revenue.</p>												
<p>w ②</p> $\text{cost of production of 1 unit} = \$50400 / 1000 \text{ units} = \50.40 $\text{closing inventory of 100 units} = \$50.40 \times 100 = \$5040$	<p>10 Correct calculation based on the candidate's own figure from part (a). This allows the examiner to award 'own figure' marks both for this and the final answer.</p>												
<p>c. It would be better to choose option 1 as more profit is generated even though there will be a closing inventory of 100 units. In option 2 the profits decrease by a greater percentage than will not be accepted by management. Also it would mean that they should change the quantity of raw materials bought, number of workers would be too much for a smaller production, therefore they would have to fire them, also other expenses may change if they choose option 2. Therefore, they should opt for option 1.</p>	<p>11 A good definite decision.</p> <p>12 The candidate justifies their decision, so earns a mark here.</p> <p>13 A good point about the impact on workers if option 2 were chosen.</p>												
	<p>Mark for (b) = 3/5</p> <p>Mark for (c) = 3/5</p> <p>Total marks awarded = 15 out of 25</p>												

How the candidate could have improved their answer

(a) (i) The candidate treated the carriage inwards on raw materials as income rather than an expense. The label and figure for the cost of raw material used were also missing. The manufacturing account stopped at the cost of production. The candidate should have added the factory profit element, and combined it with the cost of production, to arrive at the transfer cost.

(a) (ii) Failing to calculate the factory profit in (a) (i) meant that this was not included in the income statement. The label of 'net profit' for the final figure was not accepted; it should have been 'profit for the year' in line with International Accounting Standard 1 (IAS1).

(b) This was quite well done. The inventory adjustment was based on the candidate's own figures and so could be rewarded. The decrease in general office expenses was missed as a direct result of the candidate not calculating the factory profit so this was not adjusted here.

(c) The candidate made valid points here. However, they also needed to consider other points specific to option 1, such as not damaging relationships with suppliers. In a question where candidates are asked to choose between different options, evaluation of the alternative(s) is also likely to be rewarded. Presenting a one-sided answer will not receive full marks.

Mark awarded = **(a) (i) 4/8, (ii) 5/7**

Mark awarded = **(b) 3/5**

Mark awarded = **(c) 3/5**

Total marks awarded = 15 out of 25

Example candidate response – low

(i)(i)	Manufacturing Account for the year ended 30 April 2016		
1	Raw Materials: opening	\$ 10 00	\$.
	less: closing	(3 00)	
	Add: purchases	12 00	10 00
	Add: carriage inward		1 00
	Prime cost 2		11 00
	Add: factory workers wages		175 00
	Prime cost 3		28 700
	Add: indirect costs:		
	factory supervisor's Salary 4	3 200	
	office salaries, factory Overheads	9 400	
	Rent Rent (76.10 x 8000)	6 000

	Cost of production 6	30 275	
			80 275
(a)(ii)			

Examiner comments

1 This receives a total of 12/25 and is an example of a low-level answer.

2 A label such as 'Cost of raw materials consumed' is required here. This would have earned a mark.

3 The candidate gives the figure and correctly labels it, earning a mark.

4 The candidate has crossed out the Factory Supervisor's salary. This should have been included as part of the indirect costs of the factory.

5 The candidate attempts to calculate the factory profit on the transfer of finished goods. However, the percentage has been calculated on the prime cost figure rather than the cost of production figure, which would include factory indirect costs. The label is also wrong; it should be 'Factory profit'. Correct label and figure were required for the mark. Had the candidate calculated a figure for factory profit based on their own factory cost of production and correctly labelled it, an 'own figure' mark would have been awarded.

6 The candidate has correctly labelled their own figure for cost of production. Thus an 'own figure' mark is awarded.

Mark for (a) (i) = 5/8

<p>(b) Calculation of expected annual profit if option 1 is implemented:</p> <p>10 Net Sales ($\frac{95000}{100} \times 900$) = 85500. less: Cost of production ($\frac{80275}{1000} \times 1000$) = (80275) Add: Finished Goods = (-35875) less: General office expenses ($50\% \times 10000$) + ($50\% \times 85500$) ($\frac{5000}{1000} \times 900$) = (9500) less: Factory Supervisor's Salary = (8200) less: Office Salaries = (5500) less: Rent = (2000) less for the year implementation = (22975)</p>	<p>10 This section earns no marks. The candidate has taken an incorrect approach to try to calculate the revised profit figure. They should have started with their own profit figure from part (a) and adjusted that by the various components to arrive at an alternative profit figure.</p> <p>Mark for (b) = 0/5</p>
<p>(c) Option 2 brings a profit of \$15200 and 11 Option 1 brings a loss of \$22975. The general office expenses will be reduced with option 2. There will be no finished goods as and as a result there is no chance of them to get damaged. 12 Losses incurred are prevented. Less production means less factory workers wages need to be paid and hence reducing the cost of prime cost. 13 14</p>	<p>11 The candidate simply repeats the answer to their earlier profit calculations here. It is not a decision, so no marks can be awarded.</p> <p>12 This is a valid point.</p> <p>13 This, too, is a valid point.</p> <p>14 The candidate does not choose an option based on their figures, so does not get a mark here.</p> <p>Mark for (c) = 2/5</p> <p>Total marks awarded = 12 out of 25</p>

How the candidate could have improved their answer

(a) (i) The cost of raw materials used was not labelled, so no mark could be awarded for the figure given here. Candidates should always label items, as marks can only be awarded if both the label and figure are present. The candidate included the factory supervisor's salary in the list of factory overheads then crossed it out, so no mark could be awarded for this. The calculation of the factory profit was worked out using the prime cost rather than the cost of production.

(a) (ii) Again, the issue here was not labelling items, in this case the gross profit. The factory profit calculated in (a) (i) needed to be included in this section as well.

(b) The candidate started their answer from the wrong point, reworking the income statement. They needed to start with their own figure of profit for the year from (a) (ii) and make adjustments to that.

(c) The candidate needed to make a recommendation to the management here. When the question asks candidates to choose an option, any comment such as 'choose option 1' will be rewarded with one easily obtained mark.

Mark awarded = **(a) (i) 5/8, (ii) 5/7**

Mark awarded = **(b) 0/5**

Mark awarded = **(c) 2/5**

Total marks awarded = 12 out of 25

Common mistakes candidates made in this question

(a) Not labelling or wrongly labelling items such as 'gross profit' or 'profit for the year'.

(b) Many candidates approached the question in the wrong way, e.g. by starting at the wrong point.

(c) Many candidates omitted to make a recommendation and/or failed to discuss both options.

Question 3

Example candidate response – high	Examiner comments								
<p>(a) <u>Goodwill = Business purchase - Net assets taken over</u></p> <p style="text-align: center;">Price at fair value</p> <p style="text-align: center;">$= \\$ 440\,000 - [280\,000 + 146\,000 + 295\,000 + (17\,200 - 12\,000) - 116\,000]$</p> <p style="text-align: center;">$= \\$ 111\,500$</p> <p>Cash and cash equivalents $= \\$ 7100 - 70\,000$</p> <p style="text-align: center;">$= \\$ (62900)$</p> <p style="text-align: center;">\$</p> <table> <tr> <td>Cash</td> <td>70 000</td> </tr> <tr> <td>8% Debentures (2025)</td> <td>120 000</td> </tr> <tr> <td>Ordinary shares</td> <td>250 000 — SP \$ 150 000</td> </tr> <tr> <td></td> <td><u>440 000</u></td> </tr> </table>	Cash	70 000	8% Debentures (2025)	120 000	Ordinary shares	250 000 — SP \$ 150 000		<u>440 000</u>	<p>① A good example of the candidate setting out and labelling their workings before starting on their answer.</p>

Cash and cash equivalents		62 900
Total equity and liabilities		1927 000

2 This excellent answer to question 3 is awarded 25/25.

3 The whole section for non-current assets is correct and properly labelled.

4 A correct label for the intangible asset of goodwill, for which a mark is awarded.

5 This figure is correct. The inclusion of workings at the beginning of a question allows the examiner to look back and award marks if appropriate.

6 Again, the correct use of the full label for trade and other receivables.

7 Excellent use of labels.

8 Here, the 8 % debenture is correctly separated from the current liabilities and labelled as a non-current liability.

Mark for (a) = 16/16

This allows the examiner to award marks where appropriate.</p>
Interest on debenture (8% x 120 000)	\$ 9 600	9														
Dividends (3% x 250 000)	7 500															
	17 100															
Interest on bank deposit (4% x 70 000)	2 800															
	<u>19 900</u>															
<p>Profit for the year after appointing her nephew</p> <table style="width: 100%; border-collapse: collapse;"> <tr> <td style="padding-bottom: 5px;">Profit for the year</td> <td style="text-align: right; vertical-align: bottom;">\$ 41 600</td> <td></td> </tr> <tr> <td style="padding-bottom: 5px;">Salary</td> <td style="text-align: right; vertical-align: bottom;">(\$20 000)</td> <td></td> </tr> <tr> <td></td> <td style="text-align: right; vertical-align: bottom;"><u>21 600</u></td> <td></td> </tr> </table>	Profit for the year	\$ 41 600		Salary	(\$20 000)			<u>21 600</u>								
Profit for the year	\$ 41 600															
Salary	(\$20 000)															
	<u>21 600</u>															
<p>Husna might not have made 10 the right decision in selling the business because previously she would make 11 a drawings of \$36 000 and now her annual return is only 11 \$19 900. Even if she employs her nephew to manage the business, the profit that her business would get is \$21 600 which is still more than her annual return 12 this profit can also rise in the future.</p>	<p>10 The candidate starts by making a tentative assessment.</p> <p>11 The candidate starts to justify their decision here, using the financial data from the earlier calculations shown in their workings.</p> <p>12 They now compare the two options on financial grounds.</p>															
<p>However, by selling her business to a company 10 can help in return of ordinary shares 13 can help her to obtain higher dividends in the long term as the profits of a limited company is likely to increase more than the profits 10 of a sole trader. Husna can also make a capital gain by selling her shares when the market price per share will increase.</p>	<p>13 The candidate now develops their argument by bringing in other factors to support their conclusion.</p>															

Example candidate response – high, continued	Examiner comments
<p>Overall, given the difference between her annual return from FLF Limited and the profit from employing her nephew is not too significant and in the long run, the return from the investment in FLF Limited can also be higher than the profit if the dividends yield increases. It is also more secure to invest in the company and thus, Husna made the right decision to sell her business.</p> <p style="text-align: center;">15</p>	<p>14 The candidate now sums up their arguments for and against Husna's decision.</p> <p>15 Although the candidate started this answer with a rather tentative assessment in their opening paragraph, they now finish with a conclusion that is firmly based on their arguments for and against Husna's decision. This is an excellent example of a well-constructed and balanced argument and worthy of full marks.</p> <p>Mark for (b) = 9/9</p> <p>Total marks awarded = 25 out of 25</p>

How the candidate could have improved their answer

(a) Although the layout of the statement of financial position was in line with IAS1, other layouts are also acceptable. This candidate set out their workings before writing their answer. This allowed the examiner to check through for any errors that might have appeared, and is generally recommended practice.

(b) Again, the candidate set out the calculations relevant to their answer right at the start, something which is recommended practice.

Mark awarded = **(a) 16/16**

Mark awarded = **(b) 9/9**

Total marks awarded = 25 out of 25

Non Current Liabilities - 5 8% Debentures	169600 120000 289600	
Total Equity and Liabilities	1742100	
(b) Dividend yield = 3%. 6		6 This was given in the question, so no mark awarded.
Husna is now an individual receiving dividend yield of 3% and bank interest at 6%. She is now free of the business responsibility and stress. She will not have to incur losses on financial transactions. However, she will no longer receive higher profits if her business were to improve and experience higher profits. 8 She will not have the reputation of manager.		7 A valid point about Husna's position now the business has been sold. 8 Another valid point about what she has possibly given up by selling the business.
9		9 The candidate does not give a final assessment of whether or not Husna made the correct decision. Had they done so, they would have gained a mark, simply for making a judgement.
		Mark for (b) = 2/9
		Total marks awarded = 14 out of 25

How the candidate could have improved their answer

(a) The candidate set out their workings before attempting the statement of financial position. In doing so, they prepared what they termed a realisation account, arriving at a realisation profit of \$111 500. Unfortunately, they did not identify this as the figure required in the statement for goodwill, and consequently did not include it. Thus, no marks could be awarded for their workings. Instead, they included what they believed to be goodwill in their workings for the owner's capital account. This resulted in failing to calculate the revaluation reserve which was required for the statement. These factors were the reasons for full marks not being awarded.

(b) This section was not answered well. The candidate made two valid points about Husna no longer having responsibility for running the business and not earning a higher profit if the business improved. However, they needed to support this with calculations. For example, they could have compared what Husna would earn from selling the business with what she earned from running it or would earn from getting her nephew to run it. Closer reading of the question, which specified that answers should be supported with calculations, might have helped the candidate here. The fact that nine marks were available for this question should have told the candidate that they needed to make several points, backed up by figures where appropriate. Finally, they needed to make a definite assessment about whether or not Husna made the correct decision.

Mark awarded = **(a) 12/16**

Mark awarded = **(b) 2/9**

Total marks awarded = 14 out of 25

Example candidate response – low

a)	FLF Limited's Statement of financial position on 1 July 2016

	Add: Bank interest	80 7
		41 680
	Less: Salary	20 000
		21 680

Examiner comments

- 1 This answer earns a total of 9/25 marks.
- 2 The candidate correctly uses this figure, but the amount of \$815 100 is incorrect so no marks can be awarded for it.
- 3 No addition has been made for the extra equipment.
- 4 Good use of the correct label here.
- 5 Ideally, only the amount of cash held by the company should have been included here. The bank account was overdrawn and should have been shown as a current liability. In the statement of financial position, items should not be netted off.
- 6 The 8 % debentures require a heading of 'Non-current liabilities' in order for a mark to be awarded.
- Mark for (a) = 8/16
- 7 No mark can be awarded here, as the calculation of bank interest is incorrect. The candidate is also mixing up the two situations. The bank interest would have been paid to Husna if she had sold the business. The salary would have been paid to her nephew if she had kept the business.

b)	Purchase consideration	440 000																					
	Add: Dividend received	3 000																					
		443 000																					
	Less: Interest	9 600	8																				
		433 400																					
<p>9 Husna made the right decision in selling the business as she would receive a higher amount when selling the business rather than employing her nephews to run the business.</p>			9 The candidate gets a mark for making an assessment here. However, they do not go on to justify this or to consider what might have happened if Husna had not sold to the limited company.																				
			Mark for (b) = 1/9																				
			Total marks awarded = 9 out of 25																				

How the candidate could have improved their answer

The main issue with this answer was that the candidate did not set out any workings before starting their statement of financial position. Therefore, it was impossible to award any marks for wrong figures.

(a) With the non-current assets, the candidate only included the original values for premises and equipment, in the first case not taking the revalued figure of \$1 000 000 and in the second not adding the new equipment of \$14 600. There was a good attempt at calculating and labelling goodwill.

In the current assets, the candidate netted off the cash in hand and the bank overdraft. Netting off figures in this way should be avoided when preparing the statement. The bank overdraft should have appeared in the current liabilities as an overdraft.

As the candidate did not update the non-current assets with their purchase valuation, so too the equity did not include the revaluation reserve. However, it did through the 8 % debentures. These are non-current liabilities and should have been included as such under the appropriate heading.

(b) The calculations presented by the candidate were not relevant to the situation, other than the bank interest of \$9 600. This was used incorrectly, so no marks could be awarded. The candidate made an assessment of the decision taken by the owner but would have earned more marks if they had discussed this fully.

Mark awarded = (a) 8/16

Mark awarded = (b) 1/9

Total marks awarded = 9 out of 25

Common mistakes candidates made in this question

(a) Many of the points mentioned in relation to the low-level answer were typical of the common errors made. The main issue with the statement of financial position was failing to label items. Incorrect treatment of the debentures was common. Many candidates did not show any workings and so the examiner was unable to reward some items.

(b) Many candidates did not discuss the two choices (selling or retaining the business). Likewise, failing to include any calculations, even though prompted to do so by the question, was common.

Question 4

Example candidate response – high	Examiner comments
<p>ca) Auditors will make sure accounting records are same as business activities. Auditors make sure financial statements has full and fair view, all the company assets and liabilities are included in financial statement. Auditors will make sure the accounts has no error, or else they will qualify the accounts or reports. Auditors will make sure the accounts and financial statements comply with international accounting standards. Auditors will make sure the reports or accounts are unbiased. Auditors will make sure proper accounting policies are used in preparing the accounts. A qualify qualified report will be prepared by auditor if the rep accounts do not show true and fair view. 2</p>	<p>1 This is awarded 24/25 and is a good example of a high-level script.</p> <p>2 This is a good example of a full answer.</p> <p>Mark for (a) = 5/5</p>
<p>(b) A qualified audit report shows that the financial statements do not the reflect full and fair view, there is error in it. 3</p>	<p>3 A good example of what a qualified audit report is and a reason why the report may be qualified.</p> <p>Mark for (b) = 2/2</p>
<p>(c) According to 4 IAS 2, inventories should should be valued at lower of cost and as net realisable value. The net realisable value of inventories is $\\$750,000 - \\$200,000 = \\$550,000$. This is lower than the cost of \$1 million. Hence, \$550,000 should be the value of inventory. 5</p> <p>6 According to 10 IAS 8, the business should apply proper accounting policy. Prudence Prudence concept should be apply the value of inventories should not be overstated. The profit of business should not be overstated as well. 7</p>	<p>4 The candidate identifies the correct IAS and also gives the contents of the IAS.</p> <p>5 An excellent example of using the figures given in the question and linking them back to the IAS referred to in the opening sentence.</p> <p>6 This IAS is not relevant to this answer.</p> <p>7 A good example here of the application of prudence.</p>
<p>8 According to IAS 36, impairment of asset. If the recoverable amount of asset is less than its carrying value, the + amount should be treated as expense and written off from the asset. The asset is said to be impaired. Hence, the inventories should be valued at \$550,000 instead of \$1 million. 9</p>	<p>8 This IAS is not relevant to the answer.</p> <p>9 A good summary of the arguments in the first paragraph.</p>
	<p>Mark for (c) = 8/8</p>

Example candidate response – high, continued	Examiner comments
<p>(d) 10 By providing a true and fair view of company's accounts, the audit report will be unqualified. If gives investors confidence to invest in the company. Potential 12 investors would be interested in investing in the company as well. When shareholders are confident in the company, the market share price 13 would rise. More investors would invest as it helps the company in future growth by obtaining more capital. It gives the company 15 a good image and reputation as well. It is a legal requirement to provide a true and fair view of company's 16 accounts.</p>	<p>10 The candidate provides good examples of the effects on shareholders of a qualified audit report.</p> <p>11 Giving shareholders confidence.</p> <p>12 Attracting other potential investors.</p> <p>13 The impact on the share price, which will definitely affect shareholders.</p> <p>14 This expands on the earlier point about potentially bringing in new shareholders.</p>
<p>(e) The audit report is not 16 valid. Aamir was an unqualifed 17 unqualified auditor, hence he has no rights to sign the audit report. There is no legal 19 validity in that report. Besides, Aamir is the brother of finance director of the company. He is related to the company, and hence, the audit report is not valid. 20</p>	<p>15 Here the candidate refers to the effect on the company rather than the shareholders, so no marks can be awarded for this point.</p> <p>Mark for (d) = 5/6</p>
	<p>16 A definite evaluation.</p> <p>17 Justification for the earlier evaluation.</p> <p>18 A well-balanced judgement of Aamir's actions.</p> <p>19 The effect of the action taken by the unqualified auditor.</p> <p>20 Further justification of why the audit report has no validity.</p> <p>Mark for (e) = 4/4</p> <p>Total marks awarded = 24 out of 25</p>

How the candidate could have improved their answer

- (a)** The candidate included five valid duties of an auditor. Although they presented them as continuous text, it would have been perfectly acceptable to present them as a numbered list or bullet points; this may save time in an examination.
- (c)** The candidate set out relevant calculations and discussed them with reference to the correct accounting standard (IAS2). However, IAS36 was not relevant to this question and could have been omitted.
- (d)** The candidate only missed out one benefit here. They could also have considered the negative effects on shareholders of not providing a true and fair view of the accounts, as this would also have earned marks.

Mark awarded = **(a) 5/5**

Mark awarded = **(b) 2/2**

Mark awarded = **(c) 8/8**

Mark awarded = **(d) 5/6**

Mark awarded = **(e) 4/4**

Total marks awarded = 24 out of 25

<p>1 In the books of Scamer Limited.</p> <p>(a) (i) They must check whether the company has given true value of their assets and liabilities.</p> <p>(ii) They verify whether the business has stated the accounting methods that have been used.</p> <p>(iii) They will go through the revenue and expenses of the business to check whether the correct figures has been given.</p> <p>(iv) The auditor will check whether the assets are in the name of the business.</p> <p>(v) The auditors will verify whether the liabilities stated is really owned by the business and not its manager.</p> <p>(b) A qualified audit report means that there have been errors in the financial statements but can be corrected, stating that the 3</p>	<p>1 This is awarded 16/25 and is a good example of a middle-range script.</p> <p>2 The first four points of this answer are valid and are awarded a mark each. The final point repeats point (iv).</p> <p>Mark for (a) = 4/5</p> <p>3 One valid point.</p> <p>Mark for (b) = 1/2</p>

Example candidate response – middle**Examiner comments**

(c) The damage incurred, is the loss of value in assets. It is an adjusting event since it is not predictable, according to the accounting standards under IAS (8). Besides, the inventory should be valued at whichever it is lower of cost and net realisable value, under IAS (1). Hence it should be valued at cost. This will reduce the current asset, eliminating the overstatement, and by net overstating profit in accordance with the prudence concept. 7

This will reduce the profit for the year, hence reducing the equity section of the business, as well as the total assets. The firm will have to recalculate its financial statements to get the correct profit. 8

(d)

A true and fair view of the company shows that the business is operating according to the rules of the IAS and accounting concepts. If the auditor do not provide a true and fair view, this means that there is something wrong with the business. It may be because of fraud cases. This will retain the attention of the media and government which may result in a bad reputation of the business. Consequently, its sales may decrease. A concrete example is the BA in Mauritius, which has now shut down, where several frauds were detected.

4 Incorrect IAS considered, so no mark awarded.

5 Here the candidate mentions the correct IAS and indicates why it may be applicable to the case.

6 The candidate does not obtain full marks here because they do not make any reference to the figures given in the question.

7 Further development on the impact of a wrong valuation on the current assets and profit.

8 Further development here, too.

Mark for (c) = 6/8

9 Although 'something fishy' is really a slang term, the point made by the candidate is valid and is awarded a mark.

10 Here, the answer does not describe the impact on the shareholder, which is what the question asked for.

11 This will have a direct impact on the shareholders and is awarded a mark.

Mark for (d) = 2/6

Example candidate response – middle, continued	Examiner comments
<p>(e) Since the auditor was an unqualified one, it ^{is} was clear that the report is not valid. It has no value. Besides that the fact that he is the brother ¹³ of the finance director of Soamer Limited, the report ^{he will give} may not be true at all. The might cover the fraud and corruption of the business in the form of false ¹⁴. Lastly, since he is an unqualified auditor, the report will not be recognised.</p>	<p>12 Two valid points in this first sentence are both awarded a mark. 13 Good development by the candidate of their earlier comment. 14 Repetition of the first sentence. Mark for (e) = 3/4 Total marks awarded = 16 out of 25</p>

How the candidate could have improved their answer

- (a) The candidate gave four valid duties of an auditor. One more duty was needed for full marks in this section, e.g. providing a report containing a comment on the true and fair view of the accounts.
- (b) Again, the candidate only needed to add something to the effect that the auditor had been unable to gather all the necessary audit evidence to gain the extra mark.
- (c) Like many others, this candidate stated the wrong IAS here, although the points they made were valid ones. However, the candidate did not make any reference to the figures given in the question. Had they stated the net realisable value of \$750 000 and the repair costs, then reached a figure at which the inventory should be recorded, it would have been possible to award full marks for the answer.
- (d) This answer needed to be more specific about the effect on shareholders of not providing a true and fair view. The candidate made two valid comments, but these were general. They needed to mention effects such as: the shareholders might lose confidence in the company and sell their shares, or the shareholders might not invest further in the business.
- (e) To gain the extra mark, the candidate simply needed to state the action that should have been taken, i.e. a qualified auditor should have been appointed.

Mark awarded = (a) 4/5

Mark awarded = (b) 1/2

Mark awarded = (c) 6/8

Mark awarded = (d) 2/6

Mark awarded = (e) 3/4

Total marks awarded = 16 out of 25

Example candidate response – low

	accounts statements
a)	i) Gather the relevant documents and information needed to check the company's accounts 1 ii) The report must be audited based on the set standards. 2 iii) The auditor must provide a true and fair view of the accounts and not be biased. 2 iv) The auditor is to advise the company managers on how to improve their accounts. 2 v) The auditor is responsible to render an opinion on the audit report. 3
b)	A qualified report is where the auditor received the relevant documents and information to render an opinion during the audit with the exception of missing a few transactions or documents. 4
c)	Referring to the International Accounting Standard (IAS), the necessary adjustment that must be made to the financial statements is the IAS 36 5 6 the impairment of assets. The impairment of assets occur when the carrying amount of the asset is more than the recoverable amount. In such circumstances the adjustment that must be made is to value the assets at the lower amount following the prudence concept. 7 8

Examiner comments

- 1 This question earns a total of 10/25, an example of a low-level script.
- 2 This is incorrect. It is not the duty of an auditor to suggest improvements such as this to the management.

- 3 Both (iii) and (iv) make the same point about the auditor providing a report to the members.

Mark for (a) = 3/5

- 4 This statement is partly correct. The auditor may identify missing transactions and documents. However, the candidate needed to add some sort of definition of a qualified audit report, or to indicate when one is issued.

Mark for (b) = 1/2

- 5 Not specific enough. The candidate needed to mention IAS2 and inventory being valued at the lower of cost and net realisable value.

- 6 No reference in the answer to the financial data given in the question. If the candidate had used this data, it would have been possible to award more marks.

- 7 IAS36 is not relevant to this question.

- 8 This statement is too general; the candidate needed to state which assets.

Mark for (c) = 0/8

Example candidate response – low, continued	Examiner comments
<p>d) The importance of shareholders the auditors providing a true and fair view of the accounts to the shareholders if that the shareholders themselves will be able to see how well the company has been doing.¹⁰ The shareholders will also be able to determine if investing in a company is a wise decision after reviewing the audited report. The auditors providing a true and fair view of the accounts will increase or decrease the confidence of the shareholders of the company depending on the verdict of the accounts. If a company has a unqualified opinion on an audit, the shareholders will gain more confidence and is more likely to approve the major plans of the company. Audits also give comparison records to the shareholders.¹¹</p> <p>e) The audit report will be readers invited. This is because the audit report was done by a unqualified auditor who is not independent of the company. ¹²</p>	<p>9 Some good points are made in the answer to this section.</p> <p>10 The shareholders will obtain information on performance from the accounts rather than the audit report.</p> <p>11 A good point about whether or not to invest in the company.</p> <p>12 Another good point about the impact of the audit report on shareholder confidence.</p>
	<p>13 The point relating to shareholder confidence is backed up by a specific example.</p> <p>Mark for (d) = 4/6</p> <p>14 Two good points. However, the answer needed to be developed by adding points such as: Aamir should not have signed the audit report, he may be biased because of his links with family members, or indicating any action that should be taken, e.g. appointing a qualified, independent auditor.</p> <p>Mark for (e) = 2/4</p> <p>Total marks awarded = 10 out of 25</p>

How the candidate could have improved their answer

- (a) The candidate needed to add two additional comments in order to gain full marks. They could have stated that an auditor attends the stock count, checks trade or other payables, or verifies that the assets belong to the company.
- (b) The candidate needed to state that the auditor was not able to obtain all the necessary information to enable them to make their judgement.
- (c) The candidate did not demonstrate any knowledge about IAS2. A general comment about IASs was not sufficient to be rewarded. The situation is not one of impairment in respect of IAS, but of inventory valuation. A comment about the inventory being shown at the lower of cost and net realisable value and using the figures from the question to demonstrate this might have earned four marks, even without stating IAS2.
- (d) This was quite a good answer containing valid points. If the candidate had considered the other side of the argument, such as the fact that auditors do not prepare the accounts or correct errors, and that the information presented did not provide a complete picture of the business's performance, they would have gained the extra two marks.
- (e) Stating that a qualified auditor needs to be appointed or the existing auditor may be biased would have gained the other marks here.

Mark awarded = (a) 3/5

Mark awarded = (b) 1/2

Mark awarded = (c) 0/8

Mark awarded = (d) 4/6

Mark awarded = (e) 2/4

Total marks awarded = 10 out of 25

Common mistakes candidates made in this question

The most common errors were that in general candidates did not develop their answers sufficiently.

The most common issues were with part (c). Some candidates had problems with valuation of inventory and the effects of not valuing it correctly on the financial statements. Many candidates stated the wrong IASs.

Candidates should be aware that numbered lists or bullet points are acceptable and will be rewarded if correct. Using bullet points instead of continuous text may allow candidates more time for other questions.

Question 5

Example candidate response – high	Examiner comments
<p>(a) Absorption Costing Activity Based Costing ①</p> <p>(b) Number of units = $5 \times 50 \times 200$ = 50 000 units.</p> <p>Overhead cost per unit = $\frac{\\$79,000}{50,000}$ ③ = $\\$1.58$ per unit et</p> <p>(c) Machine Set-up costs</p> <p>④ No of working days = 5×50 = 250 days</p> <p>Cost per day = $\frac{\\$2,000}{250} = \\8</p> <p>Cost per unit = $\frac{\\$8}{200} = \\0.04</p> <p>Production quality inspections</p> <p>Cost per week = $\frac{\\$5,000}{50} = \\100</p> <p>Cost per unit = $\frac{\\$100}{5 \times 200} = \\0.10</p> <p>Production stoppage costs</p> <p>4 weeks → 1 stoppage</p> <p>50 weeks → $\frac{1}{4} \times 50 = 12.5$ stops.</p> <p>Cost per stop = $\frac{\\$4,000}{12.5} = \\320</p> <p>Cost per unit = $\frac{\\$320}{(4 \times 5 \times 200)} = \\0.08</p>	<p>① This candidate is awarded 21/25. A good example of a high-level script.</p> <p>② Correct identification of the method of costing used.</p> <p>Mark for (a) = 1/1</p> <p>③ Correct calculation of the cost per unit from the given data.</p> <p>Mark for (b) = 2/2</p> <p>④ Throughout their answer to (c), the candidate shows all their workings, allowing the examiner to award marks as appropriate. This section receives full marks.</p>

Example candidate response – high, continued**Examiner comments**

Machine maintenance:

$$\text{Cost per day} = \$8000 \\ 5 \times 50$$

$$= \$32$$

$$\text{Cost per unit} = \frac{\$32}{200} = \$0.16$$

Machine running costs:

$$\text{Cost per unit} = \frac{\$60,000}{5 \times 50 \times 200} \\ = \$1.2$$

Statement to show total overhead cost for each individual.

5

	\$
Machine set-up costs	0.04
Production quality inspections	0.10
Production stoppage costs	0.08
Machine maintenance	0.16
Machine running costs	1.20
Total overhead cost per unit	1.58

6

(a) this analysis is useful because it shows which overhead affect the total unit cost the most and

7 Haruka Limited can pay more attention to that overhead.

8 This method of costing is also more accurate 9 because the costs of overheads are directly apportioned to the units produced. It is also more logical and easy to understand and to calculate. 10

However, activity Based costing can be expensive to implement and to maintain. It can also be 11 difficult to train new accountants the data or

5 A good summary of all the calculations.

Mark for (c) = 12/12

6 This is not a decision about whether or not the method of costing should be used, but simply a comment on it. Therefore no marks can be awarded for it.

7 The candidate correctly identifies a benefit from the use of the method, which is rewarded.

8 The candidate goes on to describe the action the owner can take.

9 The use of the phrase 'more accurate' is quite common but is incorrect and so is not rewarded. A mark would have been awarded if the candidate had said the method is more reliable or realistic than some other methods.

10 This is not a true statement, as the earlier calculations are quite complex. No marks awarded.

11 The candidate continues by indicating correctly the negative aspects of using the method. Marks are awarded for the comments on expense and the need to train staff.

Example candidate response – high, continued	Examiner comments
<p>existing accountants this new costing method. Keeping this costing method also means that exact details of all inspections, machine maintenance/maintenance records will have to be kept which can increase the work load and the cost as well.</p>	<p>12 A valid comment about an increase in workload.</p>
<p>It is, however, advisable to Samir that this costing method should be implemented because of its above discussed benefits; especially because of its accuracy in apportioning overhead costs.</p>	<p>13 The candidate makes a definite decision and earns marks accordingly. Mark for (d) = 6/10 Total marks awarded = 21 out of 25</p>

How the candidate could have improved their answer

(d) This was the only section for which full marks were not awarded. The candidate attempted to balance their argument well and made a recommendation. However, if they had added that the benefits of Activity Based Costing (ABC) include the fact that it indicates where costs can be saved and controlled, and also mentioned cost drivers and cost pools, the extra marks would have been awarded.

Mark awarded = (a) 1/1

Mark awarded = (b) 2/2

Mark awarded = (c) 12/12

Mark awarded = (d) 6/10

Total marks awarded = 21 out of 25

Example candidate response – middle

(a) absorption budgetary control costing ①

$$\text{Overhead cost per unit} = \frac{\text{£9000}}{(50 \times 5)} \\ = \frac{200}{200} \\ = \text{£}1.58$$

②

Overheads	Overheads	units	\$
machine set-up costs	2000	50000	0.04
production quality inspections	5000	50000	0.10
production stoppage costs	4000	50000	0.08
machine maintenance	8000	50000	0.16
machine running costs	60000	50000	1.20
Total overhead	£9000		1.58

Overheads	overheads	units	\$
machine set-up costs	2000	50000	0.04

(d) Samir should ④ continue to ask for this analysis in the future years. This analysis can show Samir which parts of overheads is higher and should be taken some action to reduce it and can make more profit. It also makes Samir can compare the overhead year by year to check whether ⑦ the overhead is increase or not. This total problems of total overhead increase also can be checked with this analysis and make a survey why that parts of overheads increases. Samir know that the overheads are allocated well or not. ⑧

Examiner comments

① Incorrect method stated, so no mark awarded.

Mark for (a) = 0/1

② A correct calculation.

Mark for (b) = 2/2

③ This is a good example of one of the alternative approaches which could have been used, as shown on the mark scheme.

Mark for (c) = 12/12

④ A good, definite decision.

⑤ Good development of why the decision has been made, and the benefits this analysis should bring to the business.

⑥ The candidate only focuses on the positive aspects of ABC here. More marks could have been awarded if they had mentioned the cost, the time taken, and the fact that specialist staff are required.

⑦ Further development here.

⑧ And here.

Mark for (d) = 4/10

Total marks awarded = 18 out of 25

How the candidate could have improved their answer

(a) The candidate named the wrong method of costing used here. However, this did not stop the rest of the answer being rewarded.

(d) Although the candidate gave a valid recommendation, their answer did not explain why ABC (Activity Based Costing) makes it possible to enable cost reduction or discuss the use of cost pools and cost drivers, which would have gained more marks. There was also no consideration of the negative side to using ABC, such as the fact that it takes time, is expensive because it requires more qualified staff, and that it may not be easily understood by Samir. Considering the negative aspects would have provided more balance to the argument as to whether or not this analysis should continue to be used, and also earned several more marks.

Mark awarded = **(a) 0/1**

Mark awarded = **(b) 2/2**

Mark awarded = **(c) 12/12**

Mark awarded = **(d) 4/10**

Total marks awarded = 18 out of 25

Example candidate response – low

<p>1 In the books of Hawka.</p> <p>(a) Activity base costing : 2</p> <p>(b) Overhead cost per unit = <u>$\\$ 79000$</u> $(200 \times \\$ 390)$ $= \frac{79000}{200}$ 3 $= \\$ 1.59$ </p> <p>(c)</p> <ul style="list-style-type: none"> - 10 machine set-ups - 20 quality test - 32 runs 4 - 13 shops

Analysis sheet			
(c)		\$	£
Machine set-up costs	5 ($\$ 1.59 \times 10$)	6 15.9	12.72
Production quality inspection	($\$ 1.59 \times 20$)		31.8
Production stoppage costs	($\$ 1.59 \times 14$)		22.26
Machinery maintenance	($\$ 1.59 \times 32$)		50.88
Total cost		7 163.78	

<p>(d)</p> <p>8 ABC is a more precise way of calculating cost. It is well represented and is more detailed. The cost drivers 9 are directly related to their respective costs. ABC shows exactly how overheads can be allocated according to 10 their respective cost drivers. However, it is expensive to calculate overheads using ABC since it requires a qualified</p>

Examiner comments

1 Overall, this question is awarded 9/25.

2 Correct identification of the method used.

Mark for (a) = 1/1

3 A correct formula, which is rewarded. However, the candidate does not get the correct final answer, which should have been \$1.58.

Mark for (b) = 1/2

4 These are not workings. The candidate is quoting the figures from the question.

5 As the candidate shows their workings here, it has been possible to award marks for any correct elements.

6 A mark is awarded for identifying \$8, which must be the result of a calculation by the candidate.

7 One mark for \$32.

Mark for (c) = 2/12

8 Not a valid comment. The candidate needed to specify what ABC is more precise than, or how it is more precise.

9 The method does use cost drivers, so a mark is awarded here.

10 The candidate goes on to develop the point about cost drivers, so a further mark is awarded here.

Example candidate response – low, continued	Examiner comments
<p>accountant. It is time consuming and it is not easy to calculate. It involves a lot of procedures which might easily result in error.</p> <p>Therefore it is preferable ¹¹ for Samir not to use ABC since it is time consuming and can be expensive if a qualified accountant is solicited.</p>	<p>11 Two valid points about ABC being more expensive and time-consuming than traditional methods.</p> <p>12 The candidate completes their answer by giving a decision.</p> <p>Mark for (d) = 5/10</p> <p>Total marks awarded = 9 out of 25</p>

How the candidate could have improved their answer

(b) The candidate used the correct numerator and denominator for their calculation, but then miscalculated. If time allows in the examination, it is always worth double-checking workings.

(c) The candidate took the wrong approach in their calculations. They mistakenly multiplied their initial calculation by the \$1.59 they had calculated in (b). They appear to have mixed up two ways of answering here, using the first method shown in the mark scheme along with the second method. Therefore, very few marks could be awarded. If they had used the second method on the mark scheme but taken their own figure of \$1.59, they would have gained high marks, as, even though their figure was incorrect, they applied it correctly.

(d) There was some repetition here ('ABC is time-consuming and expensive' and comments on the use of cost drivers) and a corresponding lack of depth to the answer. When considering the positive aspects of ABC, this candidate needed to add something about it helping Samir to monitor costs more effectively and identify areas where cost savings could be made. On the negative side, they could have mentioned the fact that it is of little benefit as Samir only produces one product. The inclusion of these points would have moved the candidate a long way towards full marks for this section.

Mark awarded = **(a) 1/1**

Mark awarded = **(b) 1/2**

Mark awarded = **(c) 2/12**

Mark awarded = **(d) 5/10**

Total marks awarded = 9 out of 25

Common mistakes candidates made in this question

The wrong method of costing was often stated.

When discussing the results calculated, some candidates failed to consider both sides of an argument or develop points relating to these.

Some candidates failed to conclude their answer with a clear recommendation or decision in **(d)**.

Some candidates omitted to show any workings; it is often possible to earn some marks for correct workings even if the overall answer is incorrect.

Question 6

Example candidate response – high

(a)(i)	A cash budget is prepared using forecasted figures while a statement of cash flows is prepared using past figures																								
1																									
(ii)	It can anticipate future liquidity problems and the management can take precautionary actions.																								
3	reveal

Examiner comments

1 This candidate is awarded 22/25 for this answer.

2 A good example of comparing a cash budget with a statement of cash flow, which is what the question asked for. Many candidates simply described each, and no marks could be awarded.

Mark for (a) (i) = 1/1

3 A good example of the use of a cash budget.

Mark for (a) (ii) = 1/2

4 Correct calculation of the sales figures for each month. The candidate has remembered to add back the discount when making the calculation.

Mark for (b) (i) = 3/3

5 Correct calculation of the discount allowed, taken from the earlier answer.

Mark for (b) (ii) = 3/3

Mark for (b) (iii) = 1/1

Example candidate response – high, continued

Examiner comments

(c) Trade receivables budget			
	January \$	February \$	March \$
Opening balance	40 000	30 000	27 500
Add Credit Sales	60 000	55 000	65 000
Less Receipts	(68 500)	(56 125)	(58 375)
Cash discounts	(1500)	(1375)	(1625)
Closing balance	30 000	27 500	32 500

(d) Deficit = \$1600

Receipts - Month of sale should increase by \$1600

Increase in February's sales - $\frac{\$1600}{95} \times 100 \times 2$
 $= \$1684 \cancel{100} \times 2$
 $- \$3368 \cancel{1}$

(e) ~~The purchase of the non-current asset would not be funded.~~

1. ~~The company could issue a rights issue.~~

2. ~~The company could delay part of the payment to suppliers.~~

(f) 1. The company can make a rights issue to generate cash.
 2. Payment to suppliers can be delayed.

6 Fully correct and well-labelled presentation of the trade receivables budget.

Mark for (c) = 8/8

7 A partially correct calculation of the cash deficit. The candidate does not include the \$15 000 advertising cost, which means that only 4/5 marks are awarded.

Mark for (d) = 4/5

8 The idea of delaying payments to suppliers is rewarded. However, the making of a rights issue would take some time to organise. The reduction/elimination of the overdraft is a short-term problem, so no marks are awarded for the comment about the rights issue.

Mark for (e) = 1/2

Total marks awarded = 22 out of 25

How the candidate could have improved their answer

(a) (ii) The candidate provided one valid benefit here. However, a second was needed, for example, that it helps managers plan and control their cash flow in the future, or that it motivates staff.

(d) The candidate correctly identified and used \$1 600. The only thing they missed from their calculations is the \$15 000 advertising cost. Using that would have given them full marks.

(e) Making a rights issue is not a valid way of raising cash quickly in the short term. To implement a rights issue would take time, and the company needs an immediate solution to their cash flow issues.

Mark awarded = **(a) (i) 1/1, (ii) 1/2**

Mark awarded = **(b) (i) 3/3, (ii) 3/3, (iii) 1/1**

Mark awarded = **(c) 8/8**

Mark awarded = **(d) 4/5**

Mark awarded = **(e) 1/2**

Total marks awarded = 22 out of 25

Example candidate response – middle, continued	Examiner comments
<p>6 d.</p> <p>There should be an increase in February's sales by \$1 600. 10 But it should be the sales with credit customers who pay in the same month, otherwise the increase will go for the month of March as the other half of the credit customers make payments the following month after the sales took place. But it should be an increase of \$1 600 and onwards without making any other expenses increase because this will create once again a deficit otherwise. Using \$1 5000 for to only have an increase of \$1 600 in sales is useless and a very bad decision as this money could have been used as in another way such as expansion of the business, buying of fixed assets and other costs that could improve the business much more than only \$1 600 in sales.</p>	<p>10 A mark is awarded for correctly identifying \$1 600. However, the candidate then writes about the decision. The question asked for a calculation of how much sales needed to increase, so no further marks can be awarded here.</p> <p>Mark for (d) = 1/5</p>
<p>6 e.</p> <ul style="list-style-type: none"> • motivate workers by giving non-monetary rewards such as or by giving them more responsibilities so that they can feel more important as. 11 • Stop Reduce Make it compulsory for trade receivables / credit customers to pay in the month of sales itself rather than the half of them the following month. 12 	<p>11 This is not a valid statement. This would have no effect on the business overdraft.</p> <p>12 If the company took this action, it would have a direct positive effect on the business bank balance, so this is awarded a mark.</p> <p>Mark for (e) = 1/2</p> <p>Total marks awarded = 14 out of 25</p>

How the candidate could have improved their answer

(a) (ii) A second point, such as helping to plan cash flows, would have earned the extra mark.

(b) This was a good example of a candidate not using the discount allowed when calculating their sales figure, and was quite a common error. This was correctly identified twice in part (ii), but the calculation of the percentage was incorrect in part (iii), despite use of the correct numerator and denominator. Double-checking of answers, if time permits, might have helped to overcome this.

(d) Again, the candidate correctly identified \$1 600. However, they needed to do a calculation for this answer instead of just writing about the issue.

(e) Motivating workers is not a way of reducing a cash flow problem. Reducing costs or delaying payments are valid suggestions and would have been rewarded.

Mark awarded = **(a) (i) 1/1, (ii) 1/2**

Mark awarded = **(b) (i) 0/3, (ii) 2/3, (iii) 0/1**

Mark awarded = **(c) 8/8**

Mark awarded = **(d) 1/5**

Mark awarded = **(e) 1/2**

Total marks awarded = 14 out of 25

Example candidate response – low

Sales	Receipts - month's sale (balancing figure)	?																																															
Receipts - month's following sale	Sales 30000	30000																																															
Payment to Suppliers	(\$32000)																																																
Wages	(\$10125)																																																
Other expenses	(\$14800)																																																
Dividend paid	(\$800)																																																
Purchase of fixed asset	(\$9100)																																																
	(\$92725)																																																
$\text{Normal Sale} = 27500 \times 2 = \55000 $27500 \times 2 = \$55000$																																																	
⑬																																																	
<p>(e). Providing more discount to encourage debtors to pay earlier. ⑭</p> <p>Reducing expenses to the maximum possible and try to obtain cash discounts from suppliers. ⑮</p>	<p>⑪ Correct identification of the \$15 000 advertising cost, and the candidate identifies correctly that, when paid, this will reduce the opening bank balance.</p> <p>⑫ Marks are awarded for using the correct information in the correct manner here, even though the answer is incorrect.</p> <p>⑬ By looking at the workings, it is possible to reward the multiplication by 2 of the candidate’s figure.</p> <p>Mark for (d) = 2/5</p>																																																
	<p>⑭ There is a cost associated with offering more cash discount; it is unlikely to increase the overall bank overdraft.</p> <p>⑮ A valid point.</p> <p>Mark for (e) = 1/2</p> <p>Total marks awarded = 11 out of 25</p>																																																

How the candidate could have improved their answer

(a) (i) The candidate correctly stated that a cash budget is based on estimates. However, to add that a statement of cash flows is not, could not be rewarded. The candidate needed to state what each is based on here.

(a) (ii) The second point needed to describe what a cash budget can be used for, rather than what it shows.

(b) The candidate did not include the discount allowed when calculating their sales figures, basing them on cash received. The calculation of the discount rate was incorrect, and no workings were shown. It is essential for candidates to show workings at all times.

(c) The candidate did not use their own figures calculated for sales in part (b). Had they done so, marks would have been awarded. Also, only cash receipts for one month were used; the ‘second’ month’s receipts also need to be accounted for in the cash budget.

(d) The candidate started their answer from the wrong point by trying to rewrite the budget to include the \$15 000.

(e) Providing more cash discounts might possibly bring in more cash, but the cost of doing this may exceed the amount brought in. For a mark to be awarded, the candidate needed to consider this point.

Mark awarded = **(a) (i) 0/1, (ii) 1/2**

Mark awarded = **(b) (i) 0/3, (ii) 2/3, (iii) 0/1**

Mark awarded = **(c) 5/8**

Mark awarded = **(d) 2/5**

Mark awarded = **(e) 1/2**

Total marks awarded = 11 out of 25

Common mistakes candidates made in this question

- Not comparing and contrasting a cash budget and a statement of cash flow, only describing them.
- Not identifying a second valid use of a cash budget.
- Not taking into account the discount when calculating sales.
- Not bringing own figures into the cash budget; even incorrect figures would have earned marks, if used appropriately.
- Attempting to redraft the cash budget in part **(d)**.
- Suggesting long-term solutions, such as share issues, to a short-term cash flow problem.
